

JOSE SALGUERO

SOFTWARE ENGINEER

✉ contact@jasalguero.com 🌐 www.jasalguero.com 📍 Berlin, Germany 🇪🇸 Spanish [in](#) [LinkedIn](#)

Software engineer specialized in web application development.

I have a heavy emphasis on Frontend area (Ember.js, React, Vanilla Javascript) in the last few years but with experience in Backend (both Java and Node.js) and internal tooling (CI & CD, Git, Testing, etc)

Eager to learn and apply new cutting edge technologies and methodologies. Well organized, proactive, problem solving oriented and able to work under pressure.

I highly enjoy working international environments and providing a good team spirit. Particularly interested in high availability web development, user interfaces, high performance applications and mobile applications.

PROFESSIONAL EXPERIENCE

Aplos Software, Senior Software Engineer

06/2014 – present | Fresno, US

Architected and implemented the move from a monolithic Java/JSP application to an ecosystem of stand-alone SPA implemented in Ember.js, React, and Javascript that can be tested and deployed independently.

Integrated multiple 3rd party services like Stripe, Wepay, Finicity, Paypal, Constant Contact, and others.

Designed and implemented different internal tools and infrastructure (a design system with Storybook, web components with Stencil.js, Circle CI automatic test, and deployment, etc...)

Mentored a team of more junior developers integrating them into the company and providing technical support.

Worked with the product team to develop processes, requirements and use cases for the development team to implement

Freelance Software Engineer

2013 – present

Full stack software engineer specialized in Web Development and User Interaction.

Developing applications and consulting on:

- Client side: Javascript, React, Ember.js
